Exempt-Limited Review (ELR)

The ELR Application is a separate application, and there are different requirements depending on the type of information gathering/data collection request (see table to the right).

The SWO does not exempt any information gathering, performed by non-tribal members/entities, on or about the SWO. This application is for submitting Non-tribal entity protocols that another IRB has approved as exempt, and for new protocols assumed to meet exempt criteria. Please see the Exempt-Limited Review guide for more process details, and contact the Research Office with any questions.

- Quality Assurance/Improvement, Program Evaluation/Improvement, and Public Health Surveillance/Practice, Journalism, - No further forms required for initial review.
- Secondary Data Use Request – Also requires a Data Repository access acknowledgement and request form. If survey, interview, focus group to be included, or data sensitivity matrix requires a higher level of review then the LRRB Initial Research Application may be required.
- Research of Flora, Fauna, or Other Natural Resources &/or if intent to publish or present research findings/products, then expedited review and related processes may be required.
